Disclaimer: These reports were compiled using information provided by the City. No procedures were performed to test the accuracy or completeness of this information. The market values included in these reports were obtained by Valley View Consulting, L.L.C. from sources believed to be accurate and represent proprietary valuation. Due to market fluctuations these levels are not necessarily reflective of current liquidation values. Yield calculations are not determined using standard performance formulas, are not representative of total return yields and do not account for investment advisor fees.

Strategy Summary:

The Federal Open Market Committee (FOMC) maintained the Fed Funds target range between 0.00% and 0.25% (actual Fed Funds are trading +/-15bps). The FOMC reiterated their projected lower interest rate environment through late 2014. The European environment is trying to stabilize although difficulties remain. Chinese growth estimates reveal reductions from recent years. Unfavorable employment and unemployment trends pushed the stock markets and interest rates lower in late May and early June. Generally the economy shows modest (albeit unsteady) growth. Financial institution deposits and laddering targeted cash flows still provide the best earnings opportunity.
